## CONTENTS.

- v. 1. Beauty, illustrated chiefly by an analysis and classification of beauty in women.  
 v. 2. Intermarriage, or the mode in which, and the causes why, beauty, health, and intellect result from certain unions, and deformity, disease, and insanity from others; demonstrated by delineations of the structure and forms and descriptions of the functions and capacities, which each parent, in every pair, bestows on children, in conformity with certain natural laws, and by an account of corresponding effects in the breeding of animals.  
 v. 3. Women physiologically considered, as to mind, morals, marriage, matrimonial slavery, infidelity, and divorce. With an appendix, containing notes and additions.

Edited by an American physician.
